DETAILED ACTION

Election/Restrictions

1. Upon initial review of the claims it appears that claims 1-14 differ in subject matter and therefore require a different search. In accordance with this a restriction is deemed proper.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-13, drawn to a display in a Graphical User Interface, wherein the display includes plural configurations of a desktop configuration, classified in Class 345, subclass 778.

Group II. Claim 14, drawn to a display in a Graphical User Interface, wherein the user can navigate through the interface via a navigation apparatus, classified in Class 345, subclass 854.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, while invention Group I has separate utility such as providing a method and apparatus for switching display screens of a plurality of operating systems operating on a single processor, invention Group II is directed to navigation functions in a display within a navigation apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicates is proper.

4. A telephone call was made to Jeffrey D. Sanok on 03/15/04 to request an oral election to the above restriction requirement, but an election was not made.
